01 Research Interests

Video understanding, contextual dynamics, and efficient AI systems for social good.

My research interests center on video understanding, contextual dynamics, and efficient AI systems for social good. Beginning with sensing applications, including an ultrasonic SLAM helmet for firefighters and indoor drone tracking, I became interested in dependable systems for real settings. I now study video anomaly understanding, action recognition, and vision language models that explain anomalous behavior reliably and efficiently.

Video Intelligence

Video Understanding

Video Anomaly Detection

Video Action Recognition

02 Education

Mar 2023 – Present
Seoul, KR

Ph.D., Brain & Cognitive Engineering

Korea University

- Study contextual video understanding inspired by human cognitive processes.

Aug 2015 – Feb 2020
Seoul, KR

M.Eng., Electronic Engineering

Kwangwoon University

- Thesis: *A Study on Passive Target Tracking in Three-Dimensional Indoor Environment by Using Deep Neural Network.*
- Completed 19 months of mandatory military service.

Mar 2013 – Aug 2015
Seoul, KR

B.Eng., Electronic Engineering

TRANSFER

Kwangwoon University

- Transferred in March 2013 from the National Institute for Lifelong Education after completing B.Eng. coursework in Computer Engineering from March 2011 to February 2013.

03 Research & Work Experience

Jan 2023 – Present
Seoul, KR

Student Researcher

CURRENT

KIST AI-Robotics Institute · Vision Intelligence Group

Video anomaly understanding · Surveillance video · Vision language models

- Develop public safety video systems spanning action recognition, contextual anomaly detection, and vision language models that explain anomalous behavior. [1] [2] [3] [4] [5]

Jan 2022 – Feb 2023
Seoul, KR

Research Intern

KIST AI-Robotics Institute · Vision Intelligence Group

Began surveillance video research through urban public safety projects and national research programs.

Oct 2021 – Dec 2021
Sejong, KR

Researcher

The Korea Transport Institute

Contributed to autonomous bus development through SLAM, control center systems, policy research, and coordination.

04

Research Grants & Projects

~\$24M Five year program	Real-Time Intelligent Surveillance for Public Safety NATIONAL R&D MSIT & MOTIE · with Yonsei University and the Korean National Police Agency Video anomaly detection that uses context across city scale CCTV control centers with about 1,000 cameras, validated in Anyang City.
~\$9.5M Five year program	Mobile Platform for Active Safety Services Korean National Police Agency & MOTIE Government research program using mobile platforms for proactive public safety services.
New initiative	Anomaly Detection in Correctional Facilities KIST AI-Robotics Detecting inmate anomalous behavior in custodial environments.

06

Awards & Honors

Dec 2025	AIR Outstanding Research Award KIST AI-Robotics Institute In recognition of outstanding research achievements during 2025.
Feb 2025	Excellent Paper Award, Graduate School Korea University For outstanding research performance and publication of an excellent paper during doctoral studies.
Nov 2024	Outstanding Oral Presentation Award KIST Academia and Research Convergence Conference For the presentation "Multi-Aspect Contextual Dynamics for Anomaly Detection in Surveillance Videos."
Jul 2021	Division Commander's Commendation Capital Mechanized Infantry Division For a combat development proposal on reconnaissance drone AI improvement and acoustic detection using AI and big data.

07

Teaching

Sep – Dec 2018	Senior Capstone Project Kwangwoon University · Instructor: Prof. Youngok Kim Assisted in managing and supporting the Capstone Design Project as a TA for 50+ students.
Mar – Jun 2017	Computer Architecture Kwangwoon University · Instructor: Prof. Youngok Kim Graded assignments and provided feedback for 30+ students with Q&A sessions.
